GROUPS

19. **(B1) Create Group : Public, Patient Only**
(Represents family features/common interest groups)
20. **(B4) Logout** of doctor59 , **Login** as Patient10 , Click **All Groups** show that its publicly listed, then **Join** group
21. **(B2)** Click **All Groups**, Show that the group is not listed since its a patient only group.
22. **(B2)** Type in the url /localhost/groups/members/join/96 . Should say sorry this is a patient only group.
23. **(B3)** Musa creates a mixed private group
– (representing doctors having a subset of his patients in a group)
24. **(B2)** Click All Groups, even though im a doctor I cant see it because its private
25. **(B2)** Type in the url /localhost/groups/members/join/96 . Should say sorry this is a private group, you must be invited to join
26. **(B3)** Invite Neamtii
27. **(B2)** Click **My Group Invitations**, Now I can **join**, note by default the permission is 0, only can list members and leave the group.
28. **(B3)** Click **My Groups**, **List Members**, **Change member permissions** of Neamtii to 3
29. **(B2)** Click **My Groups**, note now I have power to delete the group, edit the group,etc.
Click List Members, Try to Change permissions of Musa Rayyan. Should be disabled.
Why? Because Musa is the creator of the group.
